## **The Story of Pegasus**

In Greek mythology, Pegasus was the winged horse that soared between heaven and earth, impressing man and the gods alike.

And no wonder. The horse was undeniably unique in its appearance. Swift and smooth, it reached far beyond the territory of mere mortal creatures. Most important of all, Pegasus was supremely loyal to its masters, calling upon its super powers to back their most challenging feats, making them heroes.

That is why, according to the ancient Greeks, Zeus made a permanent home in the sky for Pegasus. Today, as one of the largest constellations in the night sky, Pegasus remains highly sought after by its admirers.

Pegasus Printing Group, established in 2006, aims to be the winged horse of modern commercial printing. Swift. Special. Unique. Gifted. Not just a cut above traditional printers, but exceedingly empowered to meet out-of-this-world expectations.

Like the mythical Pegasus, Pegasus Printing was blessed with special gifts from its beginning. Experienced management. Modern facilities. A technically advanced staff. And most important of all, a commitment to do whatever it takes for those it serves.

This is a company to keep an eye on. The accomplishments of those who rely on Pegasus will be the stuff of legend.
